

CLOUDPHYSICIAN

[Cloudphysician](#) aspires to be the global virtual hospital. We are reimagining the delivery of critical care through patient-centric solutions. We use our advanced technology, designed and developed in-house, to increase access to care, all across the globe. Cloudphysician has been radically transforming delivery of critical care by impacting thousands of patients across India and enabling them to receive high quality care irrespective of their location and is moving towards mainstreaming this model globally.

Our Care Center, based in Bangalore, is staffed 24/7 by a highly qualified and trained critical care team that includes super-specialist doctors, nurses, dieticians, and pharmacologists. The clinical team uses our proprietary platform, RADAR, to connect to hospital ICUs to oversee and manage the care of critically ill patients across multiple regions. RADAR, built by our team of technology experts, incorporates automation, computer vision, real-time video, and data analytics to help expert care providers connect to and provide care to patients.

As of May 2025, we have cared for over 1,50,000 plus intensive care patients across 23 states in India and saved numerous lives. Learn more at: www.cloudphysician.net.

JOB DESCRIPTION

We are looking for a full-time QA Engineer. You will be responsible for maintaining top-notch quality for our suite of products as well as establishing testing standards across the organization, as it connects a centrally located team of medical experts to various peripheral hospital locations, thus enabling them to provide real-time monitoring and care of the sickest patients.

KEY RESPONSIBILITIES

- Analytical and questioning skills that lead to an exhaustive testing process.
- Minimum 2 years of experience in Automation testing using Selenium/Cypress is mandatory.
- Experience in API automation using Postman and Python (requests) will be considered a bonus.
- Minimum 1 year of experience in Performance testing using JMeter will be considered as a bonus.
- Proficiency with any programming language - Java, Python, JS.
- Proven experience in creating a framework from scratch is a plus.

PREFERRED QUALIFICATIONS

- 2-7 experience as a Test Engineer/Automation Test Engineer/SDET
- Candidates with a technical (computer science) background are preferred
